EXECUTIVE DIPLOMA IN ENGINEERING BUSINESS MANAGEMENT

Introduction

This program is an integrated program that combines the knowledge of three disciplines: engineering, business and management. This program is suitable for semi-professional workers who aspire to join engineering business management career. Increased competency among graduates of this program will support the engineering business industry to be more efficient, innovative and profitable. Increased competence and skills will also open more job opportunities such as in engineering contract management or engineering supply chain management.

Benefits

Upon completion of this program, students will:

- be competent with enhanced basic knowledge in engineering business management.
- be able to identify and solve operational problem.
- enhance their supervisory and managerial capabilities.
- acquire entrepreneurial knowledge and demonstrate entrepreneurial capabilities in seizing engineering business management opportunities.
- communicate effectively and demonstrate leadership skills to lead a multi-disciplinary team.

Entry Requirement

Passed Sijil Pelajaran Malaysia (SPM) or its equivalent with 3 credits and have working experience of at least three (3) years in the relevant field.
